About the Florida Yards & Neighborhoods (FYN) Program

The Florida Yards & Neighborhoods (FYN) program is a partnership of the University of Florida/Institute of Food and Agricultural Sciences (UF/IFAS), Florida's water management districts, the Florida Department of Environmental Protection (FDEP), the National Estuary Program, the Florida Sea Grant College Program, concerned citizens, members of private industry and numerous other nongovernmental agencies. FYN addresses the serious problems of pollution in stormwater runoff, water shortages and disappearing habitats by enlisting Floridians in the battle to save our natural resources. The program, which is implemented through the counties' UF/IFAS Cooperative Extension Service, provides education and outreach activities in the community to help residents reduce pollution, conserve water and enhance their environment by improving home and landscape management.

This integrated approach to landscaping emphasizes nine interrelated principles:

- 1 Right plant, right place**
- 2 Water efficiently**
- 3 Fertilize appropriately**
- 4 Mulch**
- 5 Attract wildlife**
- 6 Manage yard pests responsibly**
- 7 Recycle yard waste**
- 8 Reduce stormwater runoff**
- 9 Protect the waterfront**

Florida Friendly Landscape Workshop

FYN is an educational program and not a regulatory agency; however, the FDEP, the U.S. Environmental Protection Agency (EPA), the U.S. Department of Agriculture (USDA) and local governments strongly support the program. The best part is that practicing these principles benefits both the environment and you — saving you valuable time and money.
